

MAX Report Viewer

Multi functional command-line Report Viewer for Crystal Reports

The MAX Report Viewer by Velthoven Consulting can be used by command-line to show, print, save as file or email Crystal Reports. If you specify a Crystal Report as command-line the report will open automatically, you do not have to specify a MAX Company, the active MAX Company will be used by the report viewer. In the Tools Menu Setup you can add Crystal Reports to the Tools menu option of any MAX module, for an end user it will look as if the customer Crystal Report is part of the standard MAX Module.

Command-line options

The parameters for the VC MAX Report Viewer are:

- Crystal Report, Example: "C:\EXACT\RMCLIENT\EFW\ENGPRT.RPT"
- Selection Formula, Example: "{Part_Master.PRTNUM_01} = '11000'"
- Formulas and/or Parameters, Example: "RangeBy='Part is 11000';Include_Description2=1;"
- Output Printer, Example: "Printer:\\WorkPC\Canon MX330"
- Output to File (PDF or XML): Example: "File:C:\Engineering Reports\[Date]\ENGRPT.xml"
If the folder or file name replacement Lyrics can be used: Date, Company Name, User Name.
- Output to Email: Example: "Email:info@velthovenconsulting.com"
If the email has been sent an SQL Query can be run to organize that an email is sent once for a specific situation.
- Number of copies

Example of a complete command:

```
C:\EXACT\RMCLIENT\EFW\VCMAXReportViewer.exe "C:\EXACT\RMCLIENT\EFW\ENGPRT.RPT" "{Part_Master.PRTNUM_01} = '11000'" "RangeBy='Part is 11000';Include_Description2=1;" "File:C:\Engineering Report [Date].xml"
```

Upload to Synergy

The VC MAX Report Viewer has functionality of uploading a crystal report which is printed to upload it to Exact Synergy at the same time. For the Synergy Upload by the VC MAX Report Viewer the Synergy Integration in MAX has to be enabled and correctly configured.

The functionality of the document upload is similar like the standard Exact MAX upload functionality, the document is first uploaded to Exact Synergy and is then shown in the Report Viewer. Through formula fields in the crystal report the upload can be configured: Document Type ID, Security Level, Account, Subject,...

Front end for Number of Copies

A front end is available for the MAX Report Viewer to specify the number of copies. The front end can also choose for a single or multiple print jobs. With multiple print jobs a sequential number can be printed on each print out.

The front end is made flexible and can be extended with a selection for Part Numbers, Bol Tracking Number, Shop Order,....

The selected range is passed to the report through formulas StartWith and EndWith.

The individual selected items are passed to the report through a formula Individual.

Font end for Purchase Order Receipts

The Purchase Order Receipts in the Transaction History will be shown in the grid. For lot controlled Parts the Lot, Expiration Date and MAX ID from the Lot Tracking History will be shown.

The date range is defaulted to the current date and can be modified.

A part range can be entered, when the Part range is empty all Parts will be included.

The selected Purchase Order Receipts are filled in a temporary Report Extact file and the crystal report can be printed based on the temporary Report Extact file.
